CRYSTAL-INFUSION WATER BOTTLE
CARE BOOK

CARING INSTRUCTIONS AND TIPS

Use the bottle only with fresh, clean drinking water.
Never with any other liquid.

Wash your bottle every once in a while to keep it hygienic.

The glass body is dishwasher safe, however we advise to always hand wash the bottle and all of its parts with fresh water.

When removing the crystal from the glass, make sure the crystal does not touch the glass in the process.

To protect the glass, especially when on the move, use our fitted neoprene sleeve.

Care for it, keep it safe and it will do the same for you.

WELCOME TO THE WORLD OF CRYSTAL-INFUSIONS

This unique bottle is the Original Manipura Gem-Water Bottle. It was made to the highest quality standards with superior Borosilicate Glass, Stainless Steel, and of course, a genuine hand-picked crystal rock to infuse and inspire your water.

Because our crystals are natural, each one is unique in shape and shade, as well as special markings, and perfect imperfections. To keep your water pure and well-charged no glue was used to attach the rock to its base. Just a simple handmade knot by a stainless steel cord.

It is made to inspire, and to care for you for long time, but it needs you to care for it too.

BEFORE USE FOR THE FIRST TIME

Open the lid and carefully unscrew the base from the glass to remove the crystal and its protective foam. Unscrew the crystal from the base of the bottle, and hand wash all parts properly with clean water. Please make sure that the silicone rings of both the lid and the base are well-fitted into them before screwing them back on.

When done, carefully assemble all parts, fill up with fresh water and enjoy drinking from it.
